### FACING GIANTS IN LIFE & WORK

Your ability to dream is a God given gift. It's what makes you different from animals. God gave you as a human being, made in his image, the ability to see the past. That's called memory. And to visualize or imagine the future. That's called dreaming.

If you don't have a dream for your life, you're just drifting along. You're letting life happen to you. You need a dream for your life. It is the greatest gift God has given you.

Nothing happens without a dream. Everything you see - every piece of art, every business, every architecture, every product, everything happens because somebody thought it up first. Everything begins as a dream.

What causes us to be afraid to go after our dream are what we call giants in the pathway. These are dream busters that stand there blocking your path keeping you from going any further.

What do you do when you face these giants in life?
